

Voice chat app for Q&As, briefings & conversations for NUS students. Bye-bye random zoom links.

Problem statement

1. Difficult to conduct & organise mass briefings, Q&As, outreach online
2. Difficult to hire quality interns quickly due to time-consuming and inefficient hiring process
3. Difficult to have live conversations about hot topics/current events (exam discussion, hall issues, making friends in zoom university)

Existing Solutions

1. Mass emails with zoom links to briefings/Q&As/camp outreach
2. Mass-emailing, resume filtering, schedule zoom interview, accept/reject
3. NUSwhispers, r/nus, or telegram groups among hall-mates/friends

How we're better

1. **All-in-one solution**, simplify managing online events without having to dig through emails for one-off zoom links
2. **Streamlines hiring process** with quick interview sessions via rooms
3. **Voice chat platform** to exchange ideas and perspectives that may be limited by the nature of a written-medium

Features

1. **NUS-exclusive** (easy access to NUS-specific information and NUS-specific discussions such as module issues/assistance/current affairs)
2. **Scheduled rooms** allow for easy way to schedule Q&As, briefings, conversations & even interviews without one-off zoom links
3. **Calendar of scheduled rooms** simplifies tracking of date/time of events

Timeline + Potential features

1. Public/Private rooms
2. Replay discussions in rooms (audio VOD available for 24 hrs)
3. Open-source to allow other institutes to use this app among their own users.
